Personal Statement

I am currently a full-time Software Engineer working in the iGaming industry, primarily backend-focused utilising C# .NET whilst also working in React for front end development.

I've played a key role in decomposing a monolithic legacy system responsible for 32 casino integrations for 4 separate client platforms, transforming it into a highly scalable and dedicated games microservice. I spent a lot of time promoting test-driven development to overcome our testing shortcomings across both new and existing sections of our platform to ensure robust code quality as we moved away from our legacy systems, making both unit and integration tests mandatory for all new features and changes. I also helped optimise fractured data access layers across components utilising EF Core to better handle high-concurrency player traffic. All the while adhering to strict timescales and legislative compliance.

Selected Experience

FEBRUARY 2025 - PRESENT

Strive Gaming, Newcastle upon Tyne – Software Engineer

- Developed and maintained backend services for high-traffic web applications in C# .NET.
- Implemented company-first microservice used across multiple clients
- Delivered 3rd party API integrations (REST and SOAP).
- Delivered new front end features in React.
- Wrote comprehensive unit, integration, and automated tests to ensure software quality.
- Collaborated with multiple teams including Product, QA, and DevOps to deliver software releases utilising Argo and Kargo.
- Participated in code reviews and best practise checks.
- Markdown file generation for LLM context training

SEPTEMBER 2021 - FEBRUARY 2025

- SaaS PROLOG Project management
- SaaS PROLOG Project design/development
- Delivering time-sensitive code for high-profile businesses/clients
- Developing bespoke projects/solutions to meet stakeholder's requirements/scope
- Managing outsourced programming teams
- Training and mentoring junior staff
- Personal development to learn skills in aid of the company
- Production of documentation

Education

SEPTEMBER 2017 - JUNE 2020

Northumbria University, Newcastle upon Tyne

Computer Science with Games Development - First Class Honours

SEPTEMBER 2015 - JUNE 2017

Carlisle College, Carlisle

BTEC Level 3 Extended Diploma in Gaming IT - Triple Distinction* / 3 A*

SEPTEMBER 2005 - JUNE 2010

St Aidan's County Highschool / Richard Rose Central Academy, Carlisle

English: C, B

Maths: B

Science: A* A

History: B

Business Studies: B

German Language: C

Geography: C

Skills

- C# (Unity, ASP. NET, Entity Framework)
- HTML5 & CSS
- React
- SQL (SQL Server, SSMS, MySQL, Dapper)
- Testing (Unit and Integration, XUnit, Fluent Assertions, API fixtures)
- JavaScript (Knockout, Node)
- PROLOG
- Software as a Service (SaaS)
- Unreal 4 Engine
- Unity Engine
- MS Office
- Strong independent and team worker
- Excellent verbal and written communication skills
- Exceptional organisational skills

Projects

My personal work can be found either in my portfolio at <https://tryxis.github.io/portfolio/> or accessed directly through Github at <https://github.com/Tryxis>

Prior academic projects:

- Isometric shooter using custom DirectX engine (2019, Game Designer and Gameplay Programmer)
- Random dungeon environment generation using Unity (2020) – Dissertation Project
- Side scrolling combat platformer using Unreal 4 (2020) – Group Project / Interaction and AI Programmer
- Northumbria GameJam (2020, Game Designer, Gameplay Programmer)

Related Personal Interests

I've always had a tech-focused "how does that work?" mentality which spills over into personal life. I love building PC hardware, and tinkering with software sideprojects, usually for niche personal wants. My undergraduate is in Computer Science with Computer Games Development, so following technology and its trends and understanding both the technical and business side of it is something I really enjoy.
